

11 to 13 September 2024

Sorbonne University - Campus Pierre and Marie Curie, Paris - France

Main Talks

Roger Seymour:

My Double Life as an Armchair Palaeontologist

Colleen Farmer:

Do metabolic and behavioral interconnections in extant organisms provide reliable clues about extinct organisms?

Alexandra Houssaye:

The potential of new branches, while maintaining the connection with the trunk

Lene Liebe Delsett:

How to grow a fish-shaped tetrapod - Insights from modest bones and inner structures

Michel Laurin:

Bone microanatomy, lifestyle and how vertebrates moved onto land: contributions using Bone Profiler

John Hutchinson:

Reconstructing the evolutionary biomechanics of terrestrial locomotion in Archosauria

Torsten Scheyer:

Trapped in armour? Phylogenetic, functional, and palaeoecological implications of dermal ossifications in extinct tetrapods
